

19250 Self-rotary Tank Washing Nozzles

- 19250 Rotary Tank Washing Nozzles are rotary cleaning ball that uses cleaning fluid for thorough cleaning and spraying under low pressure 1 - 3 bar
- Dual ball bearings in the rotating ball nozzle makes it suitable for all industrial cleaning applications, mainly in small tanks, reactors, container.
- Self-cleaning and self-lubricating design, meets the requirements of sanitary level, unique opening design can achieve 360° without dead angle cleaning, especially for the spray bar itself and the top, can also be thoroughly cleaned.
- Made of 304SS, 316SS
- Thread size : Only 1/2" female is available

Design Feature

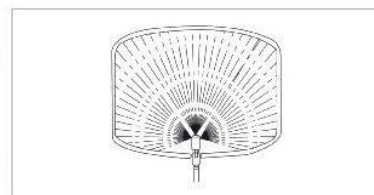

19250 compact nozzle can generate Automatic rotating force and provide side face spray through dia.25mm hole and the special position of the opening of two fan shape spray tips. The material of nozzle is 304 stainless steel. Bearing and bearing snap spring are made from hardened stainless steel in order to reach max.wear life. The max operating pressure is 13 bar and max heat-resistance temperature is 180°C.
